

Trading Screens!

- A trading board layout for all sectors of the Shipping Industry

Design you own 'real time' information display screen layout... using the unique iTmarine 'Trading Screen Organiser' (TSO) for effective broking & trading.

Data Feeds

How It Works? Take a typical SNP broking environment: the Brokers' PC screen is pitted with minimised applications, website windows and instant message pop-ups. A client calls with a query ranging from T/C rates review or trading or ship sale patterns/levels, to market opinion and latest sales or fixing rate out of specific areas...

Sample of an S&P trading board with in-house data, Baltic assessment feeds and a Chat board:

The screenshot displays a complex trading interface with multiple windows and data feeds. Key components include:

- Top Panel:** City time zones (NEW YORK, LONDON, PARIS, SINGAPORE, PERTH, SYDNEY) and a news ticker for Baltic Exchange.
- Left Panel:** A chat window with messages and a 'Whiteboard' section.
- Bottom Left Panel:** 'SnP Sales : Dry' table with columns for Tank, Demo, Ves., DWT, Blt, Yard, Gear, Eng., S-Ty., Sales Co., and Tick.
- Right Panel:** Multiple data tables:
