

Trading Screens!

- A trading board layout for all sectors of the Shipping Industry

Design your own 'real time' information display screen layout... using the unique iTmarine 'Trading Screen Organiser' (TSO) for effective broking & trading.

Screen Design/Layout

An important part of your trade is based on market opinion, advice, analysis, historical reference, forecast and guidance - using the TSO system **ALL your relevant market-related information is literally at your finger tips.**

Define and set out your trading board: Within the 'Master window' you can display an array of live-feed and internal data/ market-related information, as well as share market gossip with colleagues and SMS text any client ... instantly! **The TSO setup is specific to your own needs and retained in this format on a daily basis.**

Dual Screens

A perfect setup for Broker desks with dual-screens, move the entire 'trading board' from one screen to the other, expand the information window only when required, re-arrange the windows, and one-click to default back to your preferred trading board layout!

Sample of an "S&P trading board" with in-house data, Baltic assessment feeds and a Chat board:

The screenshot displays a complex trading interface with several key components:

- Top Left:** A chat window titled "SNPL dn-Gossip : New[003] [08:27] SNP - Manju" showing real-time messages.
- Top Right:** A "NEW YORK LONDON PARIS SINGAPORE PERTH SYDNEY" time zone display and a news feed from the Baltic Exchange.
- Middle Right:** "Tanker Indices" table showing Clean Tanker (Index 1166, Change 19.0) and Dirty Tanker (Index 1107, Change 75.0).
- Below Tanker Indices:** "Baltic Dry Index : 4270 [-5.0v]" with a date of 12 December, 2006.
- Bottom Right:** "Sale & Purchase Assessment" table listing vessel types like VLCC, Aframax, MR Prod Tkr, Capesize, Pnmx (Dry), and Super Handy with their respective sizes and prices.
- Bottom Center:** "SNP Period Rates (\$/day)" table comparing WET and DRY rates for various vessel types (VLCC, Smax, Amax-C/D, Pmax-C/D, MR, Handy) over 1, 3, and 5 years.
- Bottom Left:** "SnP Sales : Dry" table listing vessel specifications including Vessel, DWT, Bldt, Yard, Gear, Eng., S-T., Price, and Sales Com.

- * **Space saving**
- * **Time saving**
- * **Flexibility** – fully accessible home & away
- * **Quality information readily available: better information for better decisions!**

Integration

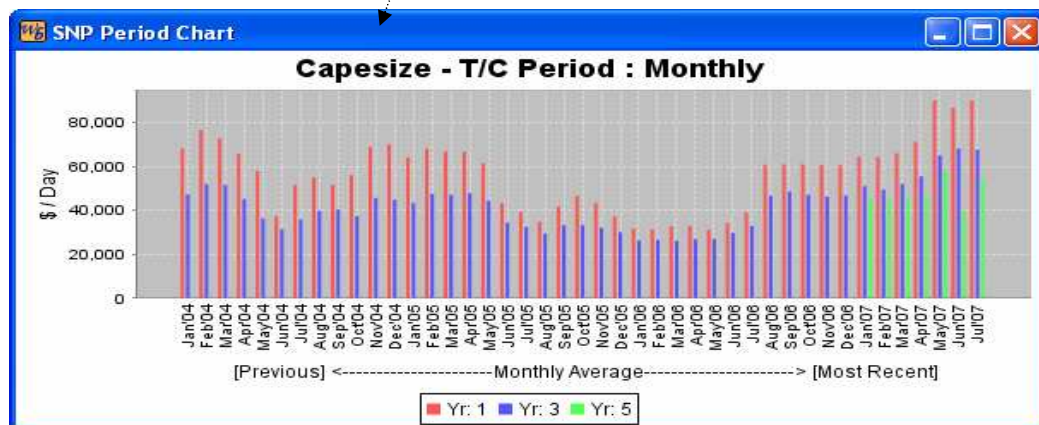

We can link into your existing database platforms so that, where appropriate, data can be shared or passed to and fro.

Sample of integration to an in-house T/C rates database: rather than review an entire spreadsheet containing 'sheets' that are irrelevant, dictate your requirements as review the data...

Graphing

Instantly produce graphs *on the fly* using the most up to date information you have – why send hours manipulating your Excel spreadsheets to produce graphs that are outdated when new data is made available to your database? The iTmarine Graphing facility immediately accesses the latest database information, current and past details, and produces a real-time graph for you:

A perfect solution for sharing information, re-gaining screen-space, reducing filing and data input, saving on search-time, yet **improving response time to client requests** - giving you more time for analysis and most important of all, personal client service!
